

Mikalor Supra Hose Clamps W5

For highly stressed applications heavy duty hose clamps are the preferred alternative to the traditional worm driven hose clip. The unique design of the Mikalor Supra heavy duty hose clamp ensures an even clamping pressure around the entire circumference of the hose clamp making them ideal for securing highly pressurised hoses or pipes, that function at high temperatures such as exhaust pipes and coolant or turbo hoses. The ingenious Mikalor "flip open front" allows easy fitment to pipes and hoses without overly stressing the clamp during assembly. The Mikalor Supra Hose Clamp W5 is a full grade 316 stainless type, destined for demanding applications where very high corrosion resistance is vital. This top of the range heavy-duty clamp is ideal for marine applications, foodstuff manufacture, pharmaceutical and petrochemical industries and other applications where AISI 316 stainless steel fittings are required.

A (mm)	r	e	a	b	Max. Torque (Nm)	Max. Pressure (Bars)
