

Westfield Fasteners Product Specification:

J Hook and Nut Bolt

This product guide contains the specification for metric threaded J hook and nut bolt in yellow zinc plated steel available from Westfield Fasteners.

Product Description

J hook bolts or also commonly known as hook bolts are supplied with their square nut. J hook bolts are designed for use in the roofing industry, they can also be used for fixing cladding and roofing panels to steel frames. J hooks can also be used for guttering, suspending cables and for landscape and fencing applications.
